PREPAR3D® v4.4

» PURCHASED DOWNLOADS

Please download and read the Download/Installation Instructions before continuing:

- [Prepar3D v4 Download/Installation Instructions](#) (578 KB)
- Note: After downloading the Full Download or downloading each of the Individual Components, use the Setup_Prepar3D.exe to install Prepar3D v4. Setup_Prepar3D.exe contains all necessary prerequisites and will completely install Prepar3D.

For more information on what was changed between releases, please read the specific version's release notes in the Learning Center.

For easier download management, the Prepar3D v3 and v4 client installer downloads are offered in two formats. The user can download the full installer package as zip file or download the individual exe, msi, and cab components directly. If you have an adequate internet connection, it is recommended that you download the full zip file package. If the full zip file is downloaded, no other files should be downloaded (the full zip file contains all required files). Please see the download/installation instructions above for more information. If you run into any issues downloading the large file, we recommend using [Internet Explorer](#) or [Mozilla FireFox](#).
